Revised October 2001

CTS Physician Survey Restricted Use File
1996/1997 Data
Introduction

> **In order to obtain and use this Restricted Use File, researchers must apply for access to the data and agree to the strict terms and conditions contained in the *Community Tracking Study Physician Survey Restricted Data Use Agreement.* Information about the application process and the data use agreement are available from the ICPSR web site (www.icpsr.umich.edu).**
>
> **Prior to applying to use the CTS Physician Survey Restricted Use File, researchers should consider whether the Public Use File would serve their analytic needs. Information on the Public Use File is available in *Community Tracking Study Physician Survey Public Use File: User's Guide* and *Community Tracking Study Physician Survey Public Use File: Codebook,* HSC Technical Publications Numbers 10 and 11, available from the ICPSR web site (www.icpsr.umich.edu).**

This codebook describes the Community Tracking Study Round 1 Physician Survey restricted use file, CTSR1PR2.TXT. The file, which is distributed in ASCII format, contains 197 variables and 12,528 physician-level records. The unique record identifier and sort key is the variable PHYSIDX. In addition to this introduction, the codebook consists of three parts, an alphabetical listing of the variables, a positional listing of the variables, and the main portion of the codebook containing counts, percentages, and descriptive information on a variable-by-variable basis.

Codebook Sections

The variables included on the file are grouped and ordered based on the questions appearing in the various sections of the survey instrument, with two additional sections for non-questionnaire related variables. Imputation flags follow the corresponding imputed variable while constructed variables are inserted next to, or in some cases, in place of the applicable survey questionnaire variable.

	Survey Administration Variables
Section A:	Introduction
Section B:	Utilization of Time
Section C:	Type and Size of Practice
Section D:	Medical Care Management
Section E:	Vignettes
Section F:	Physician-Patient Interactions
Section G:	Practice Revenue
Section H:	Physician Compensation Methods & Income Level
	Weights and Sampling Variables

Variable Listings

The codebook contains lists of the variables on the file in alphabetical and positional order. Each list includes the variable name, start and end column position, and a brief description or label for the variable. This description is limited to 40 characters and is prefaced by the following indicators: "PH"

indicates the Physician Survey, and "1" indicates the round of data collection. The questionnaire item number, "CV" (to denote a constructed variable), or "AMA/AOA" (to denote a variable from the external AMA or AOA files) follows these indicators. The same 40 character descriptions are also provided in the LABEL statement section of the SAS user file provided with the public use file.

Main Codebook

The main portion of the codebook follows the alphabetical and positional listings. Unweighted counts, cumulative counts, percentages, and cumulative percentages for each variable are displayed. The counts and percentages for each variable are arranged such that valid, non-missing data appears first, followed by missing data ("-8 Don't Know"), and concluding with inapplicable ("-1") responses which were not asked due to skip pattern logic. If a variable is a continuous or semi continuous variable (like a year or a percentage), then the values are detailed as a range of values (for example, for the variable PMC, 1-25% means that the actual data values are between 1 and 25). In addition, a number of informational fields about each variable are included to assist the user in working with the data.

These include:

Variable Name: Alphanumeric name for the variable, limited to 7 characters in length.

Variable Type: Numeric or character variable.

Length: Variable length and number of decimal places.

Start/End: Start and end columns in the ASCII data file.

Question: Questionnaire item number and text. For variables corresponding directly to a questionnaire item, the question number and text of the related questionnaire item is provided in the Question field. For constructed, survey administration, and weight and sampling variables, the Question field has a value of "N/A" to denote a non-questionnaire-related item.

Description: Brief description of the variable, primarily used with constructed or non-questionnaire variables. In addition, this field describes the set of individuals eligible to be asked a question, regardless of whether they responded. Persons not included in the universe for a particular variable were assigned a value of "-1 Inapplicable".

Additional information on variable construction and editing, as well as specific information on selected variables is included in Chapter 5 of the User Guide. To obtain site-specific or national estimates using this file, users should refer to the information on sample design and estimation included in Chapter 3 of the User Guide. In addition, Chapter 4 and Appendix D of the User Guide provide information on deriving appropriate variance estimates.

Survey Administration Variables

Variable Name	Variable Type	Length	Start	End
SITEID	Numeric	2.0	14	15

Question: N/A

Description: Practice location of physician where surveyed. This variable may differ from the original site that was selected for this physician (from the original sample design provided by the AMA) because: a) the physician was selected to be part of the National Supplement, but the practice location was in one of the 60 sites or b) the address given by the sample frame was not the correct address of the physician's practice location. Therefore, the actual practice location was in a different location than where the physician was originally sampled from. The variable SUBGRP indicates if the physician's practice location differs from the site in which he/she was sampled.

Value	Count	Cum	Percent	CumPct
0: Outside 60 sites	1,054	1,054	8.4	8.4

Section A - Introduction

Variable Name	Variable Type	Length	Start	End
YRBGN	Numeric	4.0	35	38

Question: A6

In what year did you begin medical practice after completing your undergraduate and graduate medical training?

Description: Year physician started practicing medicine. Some values are logically imputed. If the graduation year was known, but the year of starting practice was not known, then YRBGN was set equal to graduation year + 3 for primary care physicians and graduation year + 5 for specialists. If the graduation year was not known, then YRBGN was set to birth year + 30 for primary care physicians and to birth year + 32 for specialists. YRBGN is a continuous variable with values from 1901-1997.

Value	Count	Cum	Percent	CumPct
1901-1955	295	295	2.4	2.4

1: Imputation	19	12,444	0.2	99.3
-1: Inapplicable	84	12,528	0.7	100.0

Variable Name	Variable Type	Length	Start	End
HRSMED	Numeric	3.0	75	77

Question: N/A

Description: Number of hours physician spent in medically related activities during last complete week of work. Constructed from response to questions B2, B3c, and B4. If the reported number of hours in the previous week spent in direct patient care was greater than the reported number of hours spent in medically related activities, then HRSMED was imputed. Patient care is a subset of all medically related activities, and therefore, HRSPAT should be less than or equal to HRSMED.

Value	Count	Cum	Percent	CumPct
1-39	1,448	1,448	11.6	11.6

Variable Name	Variable Type	Length	Start	End
ORGC_1	Numeric	2.0	127	128

Question: C6

What kinds of organizations are these? 01 Other

Description: The type of organization with an ownership interest in the practice is not elsewhere classified in ORGC_2-ORGC_12. ORGC_1 combines the verbatim responses in C6a with the open ended responses in C6. Note: If the verbatim is recoded to other than 01 (Other), then the ORGC_1 is recoded to -1: Inapplicable. Applies to physicians who chose this category in C6 (missing for everyone else).

Value	Count	Cum	Percent	CumPct
1: Yes	114	114	0.9	0.9
-1: Inapplicable	12,414	12,528	99.1	100.0

Variable Name	Variable Type	Length	Start	End
ORGC_2	Numeric	2.0	129	130

Question: C6

What kinds of organizations are these? 02 (DK):

Description: Don't know the type of organization that has an ownership interest in the practice. ORGC_2 combines the verbatim responses in C6a with the open ended responses in C6. Applies to physicians who chose this category in C6 (missing for everyone else).

Value	Count	Cum	Percent	CumPct
1: Yes	4	4	0.0	0.0
-1: Inapplicable	12,524	12,528	100.0	100.0

Variable Name	Variable Type	Length	Start	End
ORGC_6	Numeric	2.0	131	132

Question: C6

What kinds of organizations are these? 06 Integrated health or delivery system:

Description: An integrated health or delivery system has an ownership interest in the practice. ORGC_6 combines the verbatim responses in C6a with the open ended responses in C6. Applies to physicians who chose this category in C6 (missing for everyone else).

Value	Count	Cum	Percent	CumPct
1: Yes	19	19	0.2	0.2

Question: EA

Does your practice include providing care to (read 1-3)?

Description: Categorical variable that indicates the type of patient that the physician treats (adult, child, or both). Used to assign vignettes (See FORM, below). Asked of physicians whose specialty, NWSPEC (A8), was among the following: Family practice, General practice, or Internal medicine/Pediatrics. In addition, physicians who responded to SIPNPED (A9a) or SIPPED(A9b) that most of their practice was General internal medicine or General pediatrics, were also asked this question. Pediatricians and those in General internal medicine (as defined by NWSPEC (A8)) were not asked this question. For purposes of assigning vignettes, it was assumed that pediatricians treat children only and those in General internal medicine treat adults only.

Value	Count	Cum	Percent	CumPct

Question: EA

FORM: FORM1, FORM2, FORM3

Description: Categorical variable that controls what vignette questions (if any) the physician was asked. If the physician's specialty is Internal medicine; or if the physician's specialty is Family practice, General practice, or Internal medicine/Pediatrics, and the physician treats adults only, then FORM=1. If the physician's specialty is Pediatrics; or if the physician's specialty is Family practice, General practice, or Internal medicine/Pediatrics, and the physician treats children only, then FORM=2. If the physician's specialty is Family practice, General practice, or Internal medicine/Pediatrics, and the physician treats both adults and children, then FORM=3. All other respondents skip questions E1-E21a.

Question: E1

What about treating an elevated cholesterol with oral agents for a 50 year old man who has no other cardiac risk factors except elevated cholesterol? After six months on a low cholesterol diet, his total cholesterol is 240 and his LDL is 150. His HDL cholesterol is 50, giving a ratio of total cholesterol to HDL cholesterol of 4.8. For what percentage of such patients would you recommend oral agents at this point? Consider all your patients with similar clinical descriptions.

Description: Persons who responded 6:Always to E1a were coded 100 in E1. Person who responded 1:Never to E1a were coded 0 in E1.

CAPAMTC	Numeric	2.0	325	326

Question: G11

Would you say that all, most, some, or none of the patient care revenue received from this managed care contract is paid on a capitated or prepaid basis?

Description: Physician's estimated proportion of practice's patient care revenue from largest managed care contract paid on capitated or other prepaid basis. Limited to physicians in practices with at least one managed care contract (as indicated by PMC>0 OR NMCCON(X)>0). This question was not asked of physicians where all of the managed care revenue comes from capitation (PMC=PCAPREV).

Value	Count	Cum	Percent	CumPct

Description: Joint psu inclusion probability #2. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.0007154-0.72021	8,433	8,433	67.3	67.3
-1: Inapplicable	4,095	12,528	32.7	100.0

Variable Name	Variable Type	Length	Start	End
AP3	Numeric	10.7	509	518

Question: N/A
Description: Joint psu inclusion probability #3. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.0007154-0.695178	8,433	8,433	67.3	67.3
-1: Inapplicable	4,095	12,528	32.7	100.0

Variable Name	Variable Type	Length	Start	End
AP4	Numeric	10.7	519	528

Question: N/A
Description: Joint psu inclusion probability #4. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.014173-0.892655	7,031	7,031	56.1	56.1
-1: Inapplicable	5,497	12,528	43.9	100.0

Variable Name	Variable Type	Length	Start	End
AP5	Numeric	10.7	529	538

Question: N/A
Description: Joint psu inclusion probability #5. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.013666-0.464401	3,792	3,792	30.3	30.3
-1: Inapplicable	8,736	12,528	69.7	100.0

AP6	Numeric	10.7	539	548

Question: N/A
Description: Joint psu inclusion probability #6. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.072289-0.656828	1,567	1,567	12.5	12.5
-1: Inapplicable	10,961	12,528	87.5	100.0

Variable Name	Variable Type	Length	Start	End
AP7	Numeric	10.7	549	558

Question: N/A
Description: Joint psu inclusion probability #7. Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0.063671-0.578182	1,567	1,567	12.5	12.5
-1: Inapplicable	10,961	12,528	87.5	100.0

Variable Name	Variable Type	Length	Start	End
WTPHY1	Numeric	10.6	559	568

Question: N/A
Description: Weight for making site estimates from the augmented 60 site sample. Defined for physicians in the augmented 60 sites (SUBGRP=A or C). 18 cases from this group have a 0 weight.

Value	Count	Cum	Percent	CumPct
0:Inapplicable	1,072	1,072	8.6	8.6
1.355238-133.893407	11,456	12,528	91.4	100.0

Variable Name	Variable Type	Length	Start	End
WTPHY2	Numeric	10.6	569	578

Question: N/A
Description: Weight for making national estimates from the 60 site sample. Defined for physicians in the 60 site sample (SUBGRP=A).

Value	Count	Cum	Percent	CumPct
0:Inapplicable	1,647	1,647	13.1	13.1
9.692635-207.747737	10,881	12,528	86.9	100.0

Variable Name	Variable Type	Length	Start	End
WTPHY3	Numeric	10.6	579	588

Question: N/A

Description: Weight for making national estimates from the supplemental sample. Defined for physicians in the supplemental sample (SUBGRP=C or D).

Value	Count	Cum	Percent	CumPct
0:Inapplicable	11,310	11,310	90.3	90.3
79.934859-600.00	1,218	12,528	9.7	100.0

Variable Name	Variable Type	Length	Start	End
WTPHY4	Numeric	10.6	589	598

Question: N/A

Description: A weight for making national estimates from the survey (using all observations from the combined 60 site and supplemental samples).

Value	Count	Cum	Percent	CumPct
5.483894-174.316552	12,528	12,528	100.0	100.0

Variable Name	Variable Type	Length	Start	End
WTPHY5	Numeric	10.6	599	608

Question: N/A

Description: Weight for making national estimates from the 60 site sample. Defined for physicians in the 60 sites (SUBGRP=A). Used when combining rounds of data.

Value	Count	Cum	Percent	CumPct
0:Inapplicable	1,647	1,647	13.1	13.1
9.692635-207.7477362	10,881	12,528	86.9	100.0
